Model

## RegisterLoginController

```
- currentUser: User

+ RegisterLoginController(scanner:
Scanner)<<constructor>>
+ setCurrentUser(user: User): void
+ getCurrentUser(): User

+ register(matcher: Matcher): String
+ isUsernameValid(username: String):
boolean
+ isPasswordWeak(password: String):
boolean
+ isEmailValid(email: String): boolean

+ generateRandomPassword(): String
+ generateRandomSlogan(): String
+ generateCaptcha(): String
+ setSequityQuestion(scanner: Scanner):
String
+ login(matcher: Matcher): String
+ resetPassword(): String
+ changeInfo(field: String, content:
String): String
+ changePassword(oldPassword: String,
newPassword: String): String
+ getRank(): int
+ displayProfile(matcher: Matcher):
String
```

## ProfileController

```
+ ProfileController(scanner:
Scanner)<<constructor>>
+ changeInfo(field: String, content:
String): String
+ changePassword(oldPassword: String,
newPassword: String): String
+ removeSlogan(): void
+ displayProfile(matcher: Matcher):
String
+ getRank(): int
```

## InitializeController

```
+ InitializeController(scanner:
Scanner)<<constructor>>
+ readFromFile(path: String):
ArrayList<String>
+ writeInFile(content: String, path:
String): void
+ intializBulidingsFromFile(path: String):
void
+ initializeProductsFromFile(path: String):
void
+ initializeMilitaryPersonFromFile(path:
String): void
+ initializeMapTemplate1(): void
+ initializeMapTemplate2(): void
+ initializeMapTemplate3(): void
```

## GameController

```
- currentX: int
- currentY: int
- selectedBuilding: Building
- selectedUnit: MilitaryPerson

+ GameController(scanner:
